

PROC-001 | Pump supply

Tender requirements and privacy test fields

Purpose

Compare three fictional supplier proposals against the stated requirements.
Use only the values supplied. Missing information must remain unknown.

Required technical and commercial terms

ID	Requirement	Rule	Value	Unit
R1	Flow	$\geq$	80	m3/h
R2	Pressure	$\geq$	12	bar
R3	Delivery	$\leq$	30	days
R4	Warranty	$\geq$	24	months

Fictional contact: mandatory privacy fixture

These strings are invented solely to exercise identifier detection.

PAN: TESTP0000A

Phone: 90000000000

Email: proc001@example.invalid

Review conditions

Assess the supplied evidence; do not infer missing vendor commitments.
The second page contains the proposals. No purchase prices are supplied.
All values and identities are synthetic and must not be used operationally.

PROC-001 | Pump supply

Supplier proposal table and measurement context

Supplier proposal summary

Supplier	Flow m3/h	Pressure bar	Delivery days	Warranty months
Supplier A	80	12	28	24
Supplier B	75	12	21	12
Supplier C	82	13	Not provided	24

Evidence limitations

- Supplier C did not provide a delivery period.
- Purchase prices are not present anywhere in this case.
- A listed number is a supplier claim, not an independent test certificate.

Synthetic measurement extract

Equipment	Measured flow m3/h	Measured pressure bar
P-101	78	12.4
P-102	84	11.5
P-103	81	12.2

- Measurement rows are separate from the supplier proposal claims.
- The CSV repeats these measurements for a later generated-code task.
